DETAILED ACTION

1. Receipt is acknowledged of Applicant's Prior Art Statements, filed October 11, 2001, and July 15, 2002, respectively.

2. Claims 1-62 are presented for examination.

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-60, drawn to a polishing apparatus, classified in class 451, subclass 288.

II. Claims 61-62, drawn to a method of polishing, classified in class 451, subclass 41.

4. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method can be performed by another materially different apparatus, such as one lacking a top ring body, wherein the substrate is freely supported in a carrier between polishing pads.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Claims 1, and 60-62 are generic to a plurality of disclosed patentably distinct species comprising:

Group A(Figures 1-6)

Art Unit: 3723

Group B(Figures 7-11)

Group C(Figures 12-13)

Group D(Figure 14).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
